Dashboard

Accessing Dashboard

- Navigate to the "Dashboard" section of Sprybe web portal.
- Quick actions are useful for directly navigating to the Add Device, Create, and Schedule Playlist options
- Device Status displays the status of all paired devices within the organization.

Attention Required and Smart Scan

- Attention Required displays a list of items that need to be addressed due to their vulnerability.

- Smart Scan removes media files created over 30 days ago that haven't been used in any playlist, helping to free up space through this deletion process.

- By clicking Manage Files, you can access and delete unwanted media files.

Dashboard

App Versions, Sprybe Plan and Idle Devices

• Sprybe Plan section displays the number of registered devices, the number of admin users, and the subscription details.

• The Idle Devices section lists paired devices that are currently inactive.

• App Version of devices shows the current app version running on each paired device in the organization
