Web Portal User Manual

URL Widget
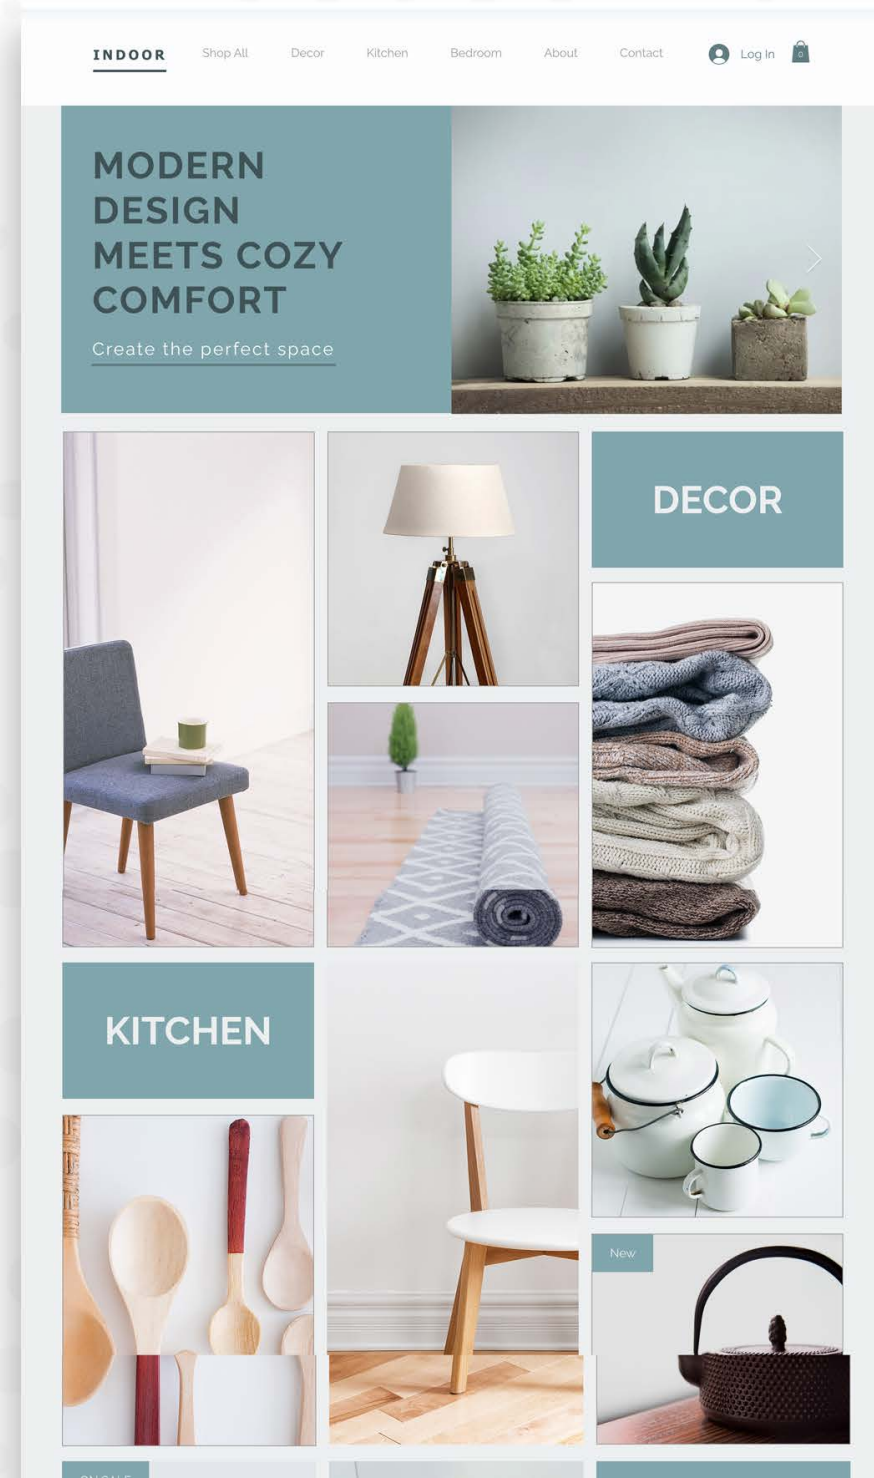

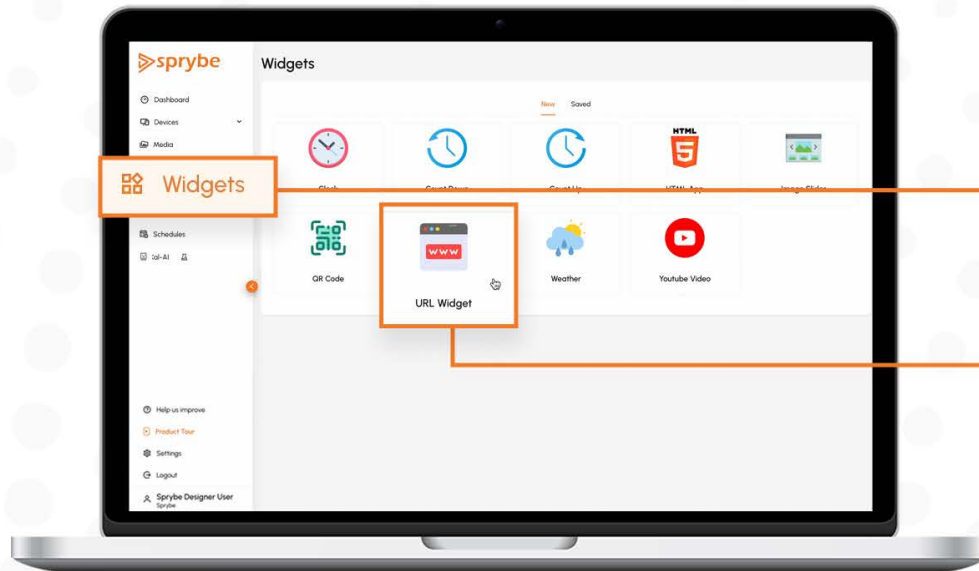

URL Widget

The URL Widget lets you easily display live web content on your digital signage screens. With a few clicks, showcase real-time websites, interactive dashboards, or dynamic online content—keeping your screens fresh and engaging. Whether it's analytics, live updates, or branded experiences, the widget ensures seamless, always up-to-date integration.

In this example, we're displaying a **home decor website to demonstrate** how effortlessly web pages can be embedded into the signage layout.
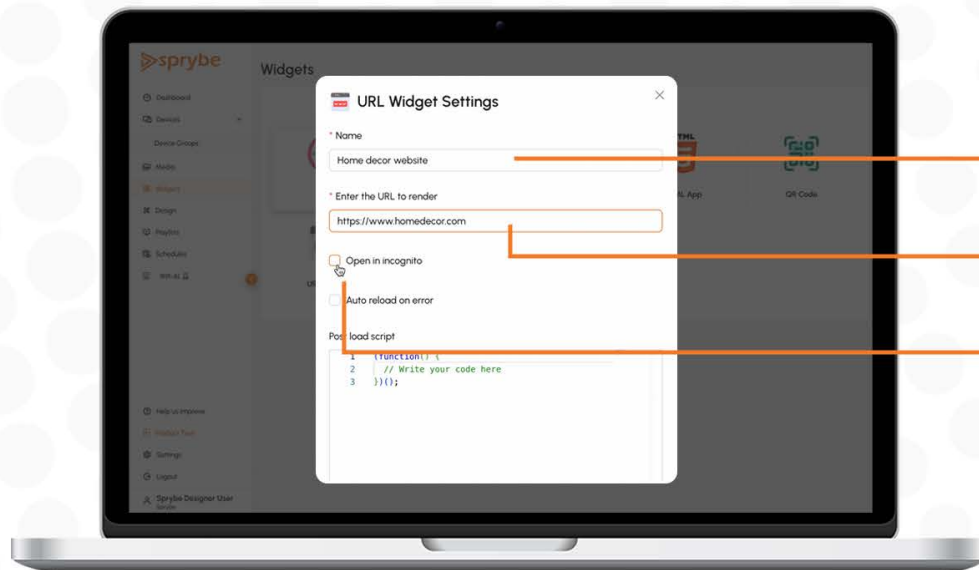

URL Widget

Step 1: Selecting a URL Widget

- In the left-hand menu, click on **"Widgets"**.

- From the list of available widgets, choose **"URL Widget"**.

Step 2: Configure URL Widget Settings

A **URL Widget** Slider settings modal will appear. Complete the following:

- **Name:** Enter a name for your widget.

- Input the desired URL that you want to render in the widget.

- Check the "Open in Incognito" checkbox if you want the URL to open in an incognito session.

URL Widget

## Step 3: Configure URL Widget Settings & Save Widget

• Turn on the "**Auto Reload on Error**" option if you want the widget to automatically reload the URL upon encountering an error. Specify the reload interval in seconds. **(Optional)**

• You can include a **post-load script** that runs after the URL is loaded. This is useful for tasks like auto-login or triggering specific actions once the page appears. **(Optional)**
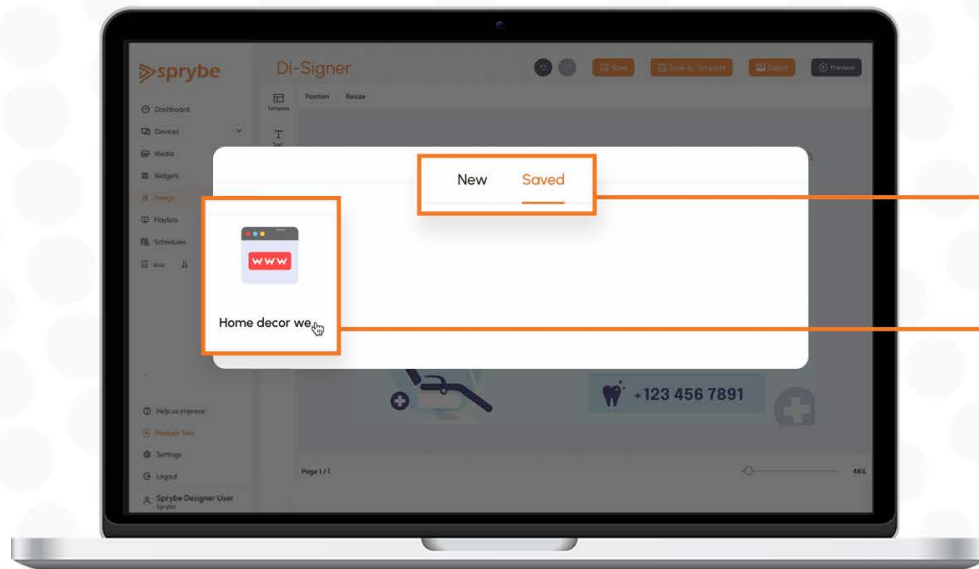

• Click "**Submit**"

Step 4: Saved tab

• Go to the Saved tab to view your saved widgets.

• Here, you can edit, view, or delete any widget.

URL Widget

## Step 5: Add the URL Widget to a Design

- Open the Design Section

- Choose a design template or create one.

- Select Widget in the left panel.

Step 6: Saved tab

- Navigate to the Saved tab and select your saved URL Widget.

URL Widget

Step 7: Add the URL Widget to a Design

• Resize and reposition it as needed.

• Save your design.

Step 8: Publish to your Screen

• Add the design to a playlist.

• Publish to your screen to display the configured URL on your selected screen.
